Team Campbell Logistics (TCL) was founded in 2008, a product of the Mike Campbell & Associates family of companies. The company focuses on the distribution of grocery and retail products in California and the surrounding states. We maintain excellent working relationships with large companies, such as Colgate-Palmolive, Crystal Geysler, National Consolidation Services, and UniLever, through Mike Campbell & Associates for several years now. Our commitment to our clients has maintained our excellent reputation for nearly thirty years.

TCL has been created to organize our increased business so that we may provide better coverage to individual companies through dedicated contract carriage. TCL has the flexibility to work with clients to fit their transportation needs and make them more competitive in their specific fields. TCL has proven its capability and experience in delivering products within the time constraints specified by our customers.

We are looking forward to the future of our company as we continue to maintain and expand the exceptional reputation of Team Campbell Logistics.

OUR SERVICES:

Our services are constantly expanding as our resources continue to grow. Currently, TCL has access to truck terminals and manages warehouse space that encompasses both refrigerated and dry storage. These sites are strategically located in California (Chino, City of Industry, Ontario, and Stockton), Arizona (Phoenix), and Oregon (Coburg). They are distribution points for our business in the states of Arizona, Nevada, New Mexico, Oregon, Washington, and all of California.

The transportation of products by the Mike Campbell & Associates companies has steadily increased over the past few decades. In the early 1980s, the original company served a few Southern California locations, mostly distributing paper bags to grocery and retail stores. The companies currently serve many of the major grocery and specialty store chains throughout the western United States, including Trader Joe's, Safeway/Vons Grocery, Stater Brothers Markets, Albertson's, and Vallarta Supermarkets. We regularly dispatch over 550 trucks and 1,100 dry and refrigerated CA CARB compliant trailers. This expansion is a small testament to our hard work and knowledge of the retail and wholesale grocery environment. Our company is widely acknowledged for its capability and experience in delivering products within the time constraints specified by our customers.
